metabotropic glutamate receptor 7 - rat
metabotropic glutamate receptor 7 - rat
metabotropic glutamate receptor 7 - rat

N.Alternate names: metabotropic glutamate receptor mGluR7
C'Species: Rattus norvegicus (Norway rat)
C'Species: Rattus norvegicus (Norway rat)
C'Species: Rattus norvegicus (Norway rat)
C'Accession: A49874; IS5984
S'Okamoto, N.; Hori, S.; Akazawa, C.; Hayashi, Y.; Shigemoto, R.; Mizuno, N.; Nakanishi,
J. Biol. Chem. 269, 1231-1235, 1994
A; Title: Molecular characterization of a new metabotropic glutamate receptor mGluR7 coup
A; Reference number: A49874; MUID:94117433; PMID:8288585
A; Accession: A49874

"C12131

metabotropic glutamate receptor 5 B - human

C;Species: Homo sapiens (man)

C;Date: 28-Aug-1985 #sequence_revision 07-Oct-1994 #text_change 05-Jan-1996

C;Accession: JC2131

R;Minakami, R.; Katsuki, F.; Yamamoto, T.; Nakamura, K.; Sugiyama, H.
Biochem. Biophys. Res. Commun. 199, 1136-1143, 1994

A;Title: Molecular cloning and the functional expression of two isoforms of humar

A;Reference number: JC2131; MUID:94197696; PMID:7908515

A;Accession: JC2131

A;Rolecule type: mRNA

A;Residues: 1-1212 cMIN>
C;Comment: This protein is coupled to guanine nucleotide binding proteins.

Mutat. 10:233-235(1997).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            PTH levels.

DiSEASE: Defects in CASR are the cause of neonatal severe primary bygerparathyroidism (NSHPT) [MIM:239200]; in which the receptor has reduced activity. NSHPT is a rare autosomal recessive lifethreatening disorder characterized by very high serum calcium concentrations, skeletal demineralization, and parathyroid hyperplasia. In some instances NSHPT has been demonstrated to be the homozygous form of FHH.

DiSEASE: Defects in CASR are the cause of autosomal dominant hypocalcemia (ADH) [MIM:601108]; in which the receptor is activated at subnormal Ca(2+) levels.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Isold=P41180-2; Sequence=VSP 002035;
TISSUE SPECIFICITY: Found in kidney, but not in brain, lung,
liver, heart, skeletal muscle, or placenta.
DISEASE: Defects in CASR are the cause of familial hypocalciuric
hypercalcemia, type 1 (FHH) [MIM:45980]; in which the receptor
hypercalcemia, type 1 (RH) [MIM:45980]; in which the receptor
homeostasis. Affected individuals exhibit mild or modest
hypercalcemia, relative hypocalciuria, and inappropriately normal

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Extracellular calcium-sensing receptor.
Extracellular (Potential).
                                                                                                                                                          messenger system.
-!- SUBCELLULAR LOCATION: Integral membrane protein.
-!- SIMILARITY: Belongs to the G-protein coupled receptor family 3.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          (Potential)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   (Potential).
